PADSTOW TOWN COUNCIL - PLANNING AND HIGHWAYS COMMITTEE: TUESDAY 13 OCTOBER 2026

Agenda Item 6: Cormac Consultation: Bus stop improvements to Trevisker Garden Centre, PL28 8LD

1.0 **Overview**

1.1 Committee will recall that the consultation for improving bus stop provision at Trevisker Garden Centre was discussed the meeting on Tuesday 8 September 2026 and it was RESOLVED that the following consultee response be submitted to Cormac:

"OBJECT until wider consideration on use of layby is undertaken. Committee note it was well used. Furthermore, has concern with the South side due to safety on 50mph road, traffic backing up on the corner which has a restricted view".

The Council Support Officer emailed Cormac with Committee's response.

2.0 **Response to consultee comment: For information**

2.1 Cormac have thanked committee for submitting a response and replied to as follows:

"We note the Committee's objection pending wider consideration of the former layby and acknowledge the view that it was well used.

"With regard to the concerns about the proposed southbound bus stop on a 50mph road, a review of the available visibility has been undertaken. There is approximately 120 metres of visibility for vehicles approaching a stationary bus at the proposed bus stop location. Speed survey data collected nearby indicates an 85th percentile speed of 50mph, and 120 metres of visibility is considered adequate for this speed in accordance with the requirements of CD 109: Highway Link Design.

"The proposed relocation of the bus stop is intended to improve upon the existing arrangement, which is located in a less favourable position. The new location has been selected to provide a safer and more suitable facility for bus users.

"In addition, the proposal has been reviewed in consultation with the road safety team, who have raised no concerns regarding the scheme.

"Your comments have been noted and forwarded to Cornwall Council for consideration as part of the consultation process. Thank you for taking the time to provide your feedback".

The Council Support Officer emailed this response to Planning & Highways Committee members on 14 September 2026 for information.
